Portfolio: <http://lluviagraphics.darkfolio.com> | **LinkedIn:** <http://www.linkedin.com/in/lovictoria>

Education

University of California, Berkeley

Bachelor of Arts in Integrative Biology & in Computer Science

Expected Graduation: December 2015

- ▶ **Biology:** Animal Behavior, Animal Physiology, Human Genetics and Genomics, Introduction to Ecological Data Analysis, Methods In Population and Community Ecology, Spider Biology, Plant Morphology
- ▶ **Computer Science:** Data Structures, Machine Structures/Computer Architecture, Efficient Algorithms and Intractable Problems, Artificial Intelligence, Internet Architecture and Protocols, Computer Security, Introduction to Microelectronic Circuits

Skills & Honors

- ▶ **Programming Languages:** *Proficient:* HTML & CSS (9 years), Python, Java, Perl; *Familiar with:* C, R, MIPS, JavaScript, PHP, MySQL/SQLite3
- ▶ **Familiar with:** Intermediate Unix, Git, Hadoop/MapReduce, BeautifulSoup4, urllib2, D3.js, SVGs, cross-browser & mobile CSS compatibility
- ▶ **Photography, Image Manipulation, and Graphic Design:** Adobe Photoshop (10 years) & Adobe Lightroom (2 years)
- ▶ **Honors:** Regents' and Chancellor's Scholarship (May 2011 – present): Merit-based scholarship awarded to the top applicants of each incoming freshman class to UC Berkeley; National Chemistry Olympiad Semifinalist (Spring 2010), Multiple awards at DECA Career Conference Competitions including qualifying for international competition (2010 – 2011)
- ▶ **Clubs:** Regents' and Chancellor's Scholars Association member – Historian Committee 2011-2012, 2013-2014; Association of Women in EE & CS – Historian Fall 2014, Vice President Spring – Fall 2015; Phi Sigma Rho Beta Class – Historian 2014-2015 – Sorority for women in STEM

Experience

Computational Intern

May – August 2015

Lawrence Berkeley National Lab (Berkeley, CA)

- ▶ Completely redesigned and added features to the Fitness Browser, a site written with Perl, SQLite3, JavaScript, and HTML/CSS that displays data about bacterial genetic fitness in different media from experiments done at the Arkin Lab for Systems and Synthetic Biology. Reworked UI for cross-browser compatibility and usability, as well as added features, such as graphs and downloadable files, to enable efficiency and access for computational biologists around the world. Public launch coming soon; see code at <https://bitbucket.org/berkeleylab/feba>.

Research Assistant

October 2014 - present

UC Berkeley EECS Department (Berkeley, CA)

- ▶ Working with two EE/CS graduate students and the EE chair to use R to analyze possible correlations between the gender of Electrical Engineering/Computer Science professors and student perceptions of those professors using course survey data. Report of findings will be completed spring 2015. Presented at the Stanford-Berkeley Research Meetup.

Other Experience

- ▶ **UC Berkeley Student Affairs Web Assistant** (May 2014 – April 2015): Assisted with the migration of images and webpages for crucial UC Berkeley websites onto a new content management system and server using basic HTML and Drupal. Took initiative to automate parts of the process using the HTML source code and Python scripts, helping to improve efficiency while ensuring consistency and quality.
- ▶ **Confess.ly Head Moderator and Marketing Intern** (October 2013 – current): Moderator responsibilities included keeping a safe and supportive anonymous community of five thousand users by flagging inappropriate, threatening, or spam posts, while marketing duties included driving traffic and buzz to Confess.ly by planning events and with guerilla marketing both on- and off-line.

Personal Projects (see GitHub for more projects and their code)

ursaMajor (<http://ursamajor.herokuapp.com>) – web app

December 2013 – December 2014

- ▶ Developer and designer for a new, comprehensive four-year academic planner for UC Berkeley students as a solution to outdated school software and a lack of a solid tool. Contributing to product design and to coding both front-end (HTML/CSS/JavaScript) and back-end (Ruby on Rails), as part of a team of seven students.

Zenblr – web app

September 2013 – November 2013

- ▶ Cofounder and head of front-end design/development. Zenblr displays one's recommendations and references in a portfolio as a tool to easily request, keep, and display one's recommendations from others for applications and more. My responsibilities included designing and building a clean, aesthetically-pleasing, functional portfolio layout using HTML, CSS, and JavaScript. (No longer in development.)

Berkeley Resources Page (<http://berkeleyresources.me>)

July 2013 - present

- ▶ Personal project to compile a well-organized page of all online resources available to UC Berkeley students, with about a thousand hits per month.

Dash Society (<http://dashsociety.com>) - game

September 2012 – January 2013

- ▶ Co-owner of an equine "sim" (simulation) game written with JavaScript and PHP featuring movable avatars and horses. Responsible for entirely designing and coding the user and horse profile pages from scratch with HTML, CSS, PHP, & MySQL, reskinning the website for the winter season, managing a team of artists, writers, and programmers, and general game design and development.
